

**Amendments to the Claims**

Claim 1 (Currently amended): A computerized method of creating a program management chart comprising the steps of:

displaying a plurality of tasks within a selected set of data as a first part of the program management chart; ~~and~~

displaying a task that is outside of the selected set of data but that is associated with at least one of the plurality of tasks within the selected set of data as a second part of the program management chart; and

differentiating within the program management chart between the plurality of tasks within the selected set of data and the task that is outside of the selected set of data.

Claim 2 (Canceled)

Claim 3 (Original): The method of claim 1 wherein the task that is outside of the selected set of data is outside of a project that contains the selected set of data.

Claims 4-11 (Cancelled)

Claim 12 (Currently amended): A computerized method of creating a program management chart comprising the steps of:

accessing a subset of data within a project;

displaying in the program management chart a plurality of tasks that are part of the project and associated with the subset of data; and

displaying a task that is part of the project and is outside of the subset of data in the program management chart at the same time as the plurality of tasks that are part of the project and associated with the subset of data.

Claim 13 (Canceled)

Claim 14 (Canceled)

Claim 15 (Original): The method of claim 12 further comprising the step of accessing a header relating to the task that is outside of the subset of data.

Claim 16 (Previously presented): The method of claim 1 further comprising accessing header data associated with at least one of the plurality of tasks within the selected set of data in order to display the task that is outside of the selected set of data.

Claim 17 (Previously presented): The method of claim 12 further comprising accessing header data associated with at least one of the plurality of tasks within the subset of data in order to display the task that is outside of the subset of data.

Claim 18 (New): The method of claim 12 further comprising differentiating between the plurality of tasks within the selected set of data and the task that is outside of the selected set of data.
